"Chippewa Valley Schools...preparing students today for the challenges of tomorrow"

August 18, 2025

Dear Parent or Guardian,

State of Michigan law requires that schools and day care centers that may apply pesticides on school or day care property must provide an annual advisory to parents or guardians of students attending the facility.

Please be advised that the Chippewa Valley Public Schools / day care centers utilize an Integrated Pest Management (IPM) approach to control pests. IPM is a pest management system that utilizes all suitable techniques in a total pest management system with the intent of preventing pests from reaching unacceptable levels or to reduce an existing population to an acceptable level. Pest management techniques emphasize sanitation, pest exclusion, and biological controls. One of the objectives of using an IPM approach is to reduce or eliminate the need for chemical applications of pesticides. However, certain situations may require the need for pesticides to be utilized.

As required by State of Michigan law, you will receive advance notice regarding the non-emergency application of a pesticide such as an insecticide, fungicide or herbicide, other than a bait or gel formulation, that is made to the school or day care grounds or buildings during this school year. Please note that notification is not given for the use of sanitizers, germicides, disinfectants or anti-microbial cleaners. In certain emergencies, such as infestation of stinging insects, pesticides may be applied without prior notice to prevent injury to students, but you will be notified following any such application.

Advance notification of pesticide applications, other than bait or gel formulation, will be given by at least 2 methods. The first method will be by posting at the main entrance to the school / day-care center. The second method will be posting at the school main office.

Please be advised that parents or guardians of children attending the school or day care center are entitled to receive the advance notice of a pesticide application, other than a bait or gel formulation, by first class United States mail postmarked at least 3 days before the pesticide application, if they so request. If you prefer to receive the notification by first class mail, please complete the attached form and return it to our office, or contact Kenneth J. Matheny at Elite Pest management who is contracted and responsible for all inspections & pesticide application procedures. Elite Pest Management can be reached at 586-294-7055 Monday thru Friday 9:00 Am—5:00 Pm.

Please be advised that parents or guardians of children attending the school may review the school's Integrated Pest Management program and records of any pesticide application upon request.

Sincerely,

Frank L. Houston

Chippewa Valley Schools

Director of Custodial Services and Skilled Maintenance

NOTIFICATION FOR SPECIFIC PESTICIDE APPLICATION

(School Name)

I would like to be notified before any specific pesticide application is made at this school. In the event an emergency application for a pest problem is needed, I will be notified afterward.

I would prefer to be contacted by (circle one): Phone Call E-Mail
